## DETAILED ACTION

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 11-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over **La Porta**; **Thomas F. et al.** [US 6434134 B1] *hereinafter* **La.** in view of **Yoshida**; **Shousei** [US 7069050 B2].

As per claim 11, La teaches:

A radio communication method (Abstract) comprising the steps of:

Maintaining identification information allotted to a radio terminal for receiving data without renewing the identification information when the radio terminal moves from an area of a first radio base station to an area of a second radio base station; and renewing the identification information when the radio terminal moves to an area of a third base station and transmitting data and the renewed identification information to the radio terminal from the third radio base station. (e.g.; Col.2; 10-32, Col.9; 53-Col.10; 36).

La doesn't teach specifically, transmitting data and the identification information to the radio terminal from the first and second radio base stations in a diversity transmission manner.

However, Yoshida teaches in an analogous art, that transmitting data and the identification

information to the radio terminal from the first and second radio base stations in a diversity transmission manner. (Col.5; 7-22, Col.8; 7-18) Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to including transmitting data and the identification information to the radio terminal from the first and second radio base stations in a diversity transmission manner in order to provide a method of an antenna <u>transmission</u> and reception in a diverse-system.

As per claim 12, La teaches:

The radio communication method according to claim 11, wherein said identification information is an IP address. (e.g. IP; Col.5; 1-16)

As per claims 13-14, La teaches the radio communication method according to claim 11, wherein said first radio base station sends primary information and said second radio base station sends secondary information, the primary information and the secondary information including same content information, and said radio terminal diversity-receives the primary information and the secondary information. (e.g. handover; Col.6; 66-Col.7; 21)

Claims 15-16 are the system, apparatus, claims, corresponding to method claim 11 respectively, and rejected under the same rational set forth in connection with the rejection of claim 11 respectively, above.

As per claim 17, La teaches:

The radio terminal of claim 14, wherein identification information and the renewed identification information are unique. (e.g. IP; Col.5; 1-16)

## Response to Amendments & Remarks

Applicant's arguments with respect to claims 11-17 has been fully considered but is moot in view of the new ground(s) of rejection.

## Conclusion

Applicant's amendment (For illustration; since newly amended claims modified the above-disclosed rejection) necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
